Ashkelon Academic College

Supporting students both on and off campus.

Solution components
Hardware

- Lenovo ThinkAgile HX3320

Software

- Lenovo XClarity
- Nutanix Cloud Platform
- Nutanix Prism
- VMware Horizon
- VMware vSphere

Services

- Lenovo Professional Services

Ashkelon Academic College (AAC) is one of the largest and most prestigious academic centers in Israel. Committed to improving access to higher education in the southwest of the country, AAC aims to triple the size of its student body in the coming years. With a flexible, scalable hyperconverged infrastructure from Lenovo and Nutanix, AAC can support this growing college community with vital digital services. What's more, the college rapidly ramped up remote learning capabilities during the COVID-19 lockdown—minimizing disruption to students' education.

"Our student population is growing fast, and we must be able to scale IT services to meet demand. The hyperconverged infrastructure from Lenovo and Nutanix is the ideal platform to support our growing college community."

Shai Cohen,
Head of Information Technology and Digital, Ashkelon Academic College
