 - Nutanix Prism
- VMware ESXi

The bank can respond to requests from the business faster, and bring new services from concept to launch quickly and cost-effectively.

Case Study

2017 Lenovo. All rights reserved.

To keep satisfying a demanding and increasing number of customers served by its Pacific Credit Card Center, Bank of Communications needed to launch innovative services faster. The bank turned to Lenovo Converged HX3500 appliances powered by Intel® Xeon® and Nutanix Enterprise Cloud Platform software, to support its vital testing and development environments – gaining the scalability and agility it needs to stay ahead in a competitive consumer credit market.
