Bringing exhibitions to life.

Belgrade Fair

Solution components
Hardware

- Lenovo ThinkAgile HX5521 Certified Node
- Lenovo ThinkSystem SR550

Software

- Nutanix AOS
- Nutanix Prism Pro

Services

- Lenovo Post Warranty Services

Belgrade Fair is an exhibition center and event space in the Serbian capital. Every year, it hosts more than 30 regular international fairs with exhibits from over 5,000 companies, attracting 1.5 million visitors. To make each event a success, Belgrade Fair depends on its IT infrastructure to power everything from exhibition planning to visitor management and access control. Years of positive experience with Lenovo technology and services convinced the organization to replace its aging servers and storage systems with a single hyperconverged infrastructure (HCI) based on Lenovo ThinkAgile HX Series. With the new solution, Belgrade Fair has boosted performance and simplified management—freeing time for IT staff to focus on the exhibitor and visitor experience.

"The simplicity and ease of management of the Lenovo ThinkAgile HX Series is exceptional. I haven't had to log in to the cluster for several weeks—it takes care of itself and saves me a lot of time."

Dragan Jovanović,
Head of IT Department,
Belgrade Fair
