- Lenovo Preconfigured Support – Warranty Service Upgrades, Response time
- Lenovo Workshop Services
- Lenovo YourDrive YourData

Blue Sky Systems prides itself on delivering outstanding IT solutions, but slow service from its previous infrastructure vendor made it difficult to meet its high standards for customer service. By teaming up with Lenovo, Blue Sky Systems has gained a partner it can rely on. The company has since replaced its entire hosting infrastructure with Lenovo ThinkSystem servers powered by AMD EPYC™ processors, enabling it to deliver responsive and consistent services to its clients.

“Lenovo is the ideal partner for a managed service provider like us. Unlike other vendors we’ve worked with in the past, Lenovo is prepared to put in the work to help us succeed.”

Jonathan Bastin,
CEO & CTO, Blue Sky Systems
