Country Garden Group and its subsidiaries aim to build green, high-quality, affordable smart cities for the benefit of the whole world. With its businesses—and data volumes—growing rapidly, the group looked for a future-ready IT platform for its mission-critical systems. Working with Lenovo and Nutanix, Country Garden Group moved its key SAP ERP solutions to a hyperconverged infrastructure powered by high-performance 2nd Gen Intel® Xeon® Scalable processors, delivering the reliability, availability, and scalability for long-term growth.

“Our hyperconverged Lenovo and Nutanix solution helped deliver on our urgent need for extra compute resources to support our key business systems, including SAP ERP. After more than a year with the new solution, it has never let us down—and we’re delighted with the stability of the platform.”

Spokesperson,
Country Garden Group
