Lenovo ThinkAgile HX5521 Certified Node with 2nd gen Intel Xeon Scalable processors

Software
Nutanix Enterprise Cloud
• Nutanix Acropolis, Prism
Lenovo XClarity
Microsoft SQL Server
SAP ERP
SAP HANA
SUSE Linux Enterprise Server for SAP Applications
VMware vSphere

"The Lenovo ThinkAgile HX solution has proven to be reliable, flexible and performant."
—Marco Monesi, CFO, IRSAP

IRSAP is one of Europe's leading suppliers of HVAC systems, with a huge range of designer radiators to suit every taste. With its product range growing year on year, IRSAP found that its existing IT systems could no longer keep up. Working with Estecom and Eurosystem, IRSAP moved its mission-critical SAP ERP workloads to the SAP HANA platform running on Lenovo ThinkAgile HX hyperconverged infrastructure—the first company in Italy to choose HCI for SAP HANA. Featuring 2nd gen Intel® Xeon® Scalable processors and Nutanix Enterprise Cloud software, the ThinkAgile HX solution has increased key workloads by up to 50%[1], enabling IRSAP to react fast to changing market trends.

[1] 50% performance increase estimate based on the average time taken to complete one SAP job—from 16,000 seconds in the past to 8,000 based on upgrade to the Lenovo ThinkAgile HX hyperconverged infrastructure with 2nd gen Intel Xeon Scalable processors.
