Delivering innovative digital services on flexible Lenovo infrastructure

Solution components

Hardware

- Lenovo System x3850 X6 with Intel® Xeon® E7 family of processors
- IBM FlashSystem V9000
- IBM Storwize V7000

Software

- Citrix XenApp
- Microsoft Hyper-V
- VMware vSphere

“The Lenovo solution has enabled us to take a first step in the transformation of IT services.”

— John Thomas, Head of IT, Isle of Anglesey County Council

Case study

Faced with large budget cuts, the Isle of Anglesey County Council wanted to ensure that the quality of public services remained high and customer satisfaction remained strong. To meet changing pressures and demands, the council replaced its aging IT infrastructure with a flexible and powerful Lenovo System server solution. Today, the council can offer exciting new digital services, such as agile working for staff and a smartphone application for citizens, all while cutting energy costs by up to 60 percent.

Isle of Anglesey County Council

The Lenovo solution delivers the high levels of performance needed to support the council's virtual server environment, based on VMware vSphere virtualization technology, and new Citrix XenApp for application virtualization and application mobility.

"We expect to reduce energy costs by up to 60 percent with the Lenovo solution – a huge saving."

— Neil Summers, IT Infrastructure Manager,
Isle of Anglesey County Council

"The Lenovo solution has enabled us to take a first step in the transformation of IT services."

— John Thomas, Head of IT,
Isle of Anglesey County Council

"The ability to respond to changing business needs enables us to provide a consistently high level of service to citizens. We are highly confident that the Lenovo solution will help us to keep delivering excellent council services in spite of austerity measures."

— John Thomas, Head of IT,
Isle of Anglesey County Council
