Streamlining patient experiences

EXOSCALE powered by Lenovo.

MeinDentist Group

Growing dental specialist MeinDentist wanted to provide a seamless patient experience across its locations and specialist practices. Together with partner it-netconsult GmbH, MeinDentist centralized its business applications with Exoscale powered by Lenovo, ensuring data protection and performance.

Customer Problem

Managing fragmented and redundant patient data slowed down billing processes and made it difficult for doctors to quickly get all the patient information they needed.

Lenovo Solution

MeinDentist and it-netconsult deployed a new patient management solution to the cloud, hosting applications and virtual desktop infrastructure on Exoscale powered by Lenovo.

Business Impact

Central and secure patient records in the cloud make it easier for doctors and specialists to work together and provide a seamless patient experience.

> "The new solution, running on Exoscale powered by Lenovo, with a single patient record was an important step to improve everyday patient experience."

Ralf Rausch
Director Administration, MeinDentist Group

- 99% faster set-up for new practices
- 5 minutes to scale up
- Streamlines patient services and reporting
