Powering advertising technology at scale to drive corporate expansion.

Supership

Solution components Hardware

- Lenovo ThinkSystem SR635 powered by 2nd Gen AMD EPYC™ processors

Software

- Lenovo XClarity

To succeed in the highly dynamic advertising technology (AdTech) market, Supership needs an IT infrastructure that can scale out to handle ever increasing demand for advertising content at lightning-fast speeds. Lenovo ThinkSystem SR635 servers, powered by 2nd Gen AMD EPYC™ processors, give Supership the massively parallel processing performance it needs to meet these requirements and keep its advertising platforms ahead of the competition.

“Lenovo ThinkSystem SR635 servers powered by AMD met all our requirements and offered excellent price-performance.”

Mr. Ryo Wada,
Infrastructure Engineer,
AdTech business area,
Supership
