

SURREY COUNTY COUNCIL

Improving cyber security through faster desktop patching with edge servers.

Solution components

Hardware

Lenovo ThinkSystem SE350 Edge Server

Software

Lenovo XClarity

Microsoft Hyper-V

Microsoft Windows 10

Microsoft Windows Server

Microsoft Windows Server Update Services

Services

Preconfigured Support - Warranty Service

Upgrades

“We selected Lenovo ThinkSystem SE350 Edge Servers because they are small, modular, robust and very versatile. The quiet, yet powerful, purpose-built Edge compute servers are easy to deploy and manage—exactly what we were looking for.”

—Ross Walker, Enterprise Architect Infrastructure Design, Surrey County Council

Surrey County Council provides essential citizen services to 1.2 million people in England. The council worked with Lenovo to deploy 20 Lenovo ThinkSystem SE350 Edge Servers with built-in security features across its decentralized offices. The implementation enables faster Microsoft Windows security updates for approximately 5,300+ employee workstations. Surrey City Council improved protection against cyber threats using cost-efficient, compact servers that were easy and quick to install. Today, the council can ensure that employee workstations are up to date with the latest patches at all times, without the need for any additional power supply or networking infrastructure.
