- Lenovo Post Warranty Services
- Lenovo Proof of Concept Lab
- Lenovo Remote Technical Support
- Lenovo Training Services

Established in 2003, Tebon Securities Co. Ltd. is a securities company with net assets of RMB 76.95 billion (approximately USD 11.86 billion) operating in China. Operating in a fiercely competitive marketplace, where speed of response is key to success, the company unleashed greater agility and enabled competitive advantage when it deployed a hyperconverged infrastructure solution from Lenovo and Nutanix, powered by 2nd Gen Intel® Xeon® Scalable processors. Tebon can now add hardware resources in less than a day, compared to the minimum three-month period it took in the past.¹ As a result, Tebon Securities can pivot quickly to take advantage of new opportunities, helping it to out-manuever competitors.

“The financial industry values stability and security. The Lenovo ThinkAgile HX platform—powered by high-performance 2nd Gen Intel® Xeon® Scalable processors—helps us maintain these two values at all times, increasing efficiency and enabling our business users with high-performance IT services.”

Tang Hui,
Technical Leader of “Tebon Financial Cloud”, Information Technology Department, Tebon Securities
