- Lenovo ThinkSystem NE1032 RackSwitch
- Lenovo ThinkSystem NE10032 RackSwitch
- Lenovo ThinkSystem NE2572 RackSwitch

Software

- Lenovo XClarity
- VMware vSphere

Historically, cloud adoption among German small and medium-sized enterprises (SMEs) has been relatively low. Lack of transparency and security concerns have held many companies back. ucs is on a mission to change that. With robust, high-performance Lenovo servers, storage, and networking underpinning operations, ucs can deliver reliable, performant cloud services that comply with strict national data protection laws—perfectly tailored to the specific needs of SMEs.

“Our Lenovo data center infrastructure delivers on performance, flexibility, stability, reliability, and build quality, so we can deliver an outstanding service for clients.”

Marco Windhausen,
CEO, ucs datacenter GmbH
