Case Study

“We have already seen a 25% decrease in the time spent on routine admin compared to our previous infrastructure and expect that to increase to a 40% time-saving in the coming months as we adjust to the new, more efficient ways of working.”

—Christoph Machner, Co-founder & Co-owner, Webquake Group

IT services provider Webquake upgrades its data center infrastructure with Lenovo ThinkAgile MX Certified Nodes for Azure Stack HCI powered by 2nd gen Intel® Xeon® Gold processors in order to deliver best-in-class client services. Webquake also expects to reduce time spent on routine admin by 40%.
